DETAILED ACTION

1. Applicant's election of Group 1, claims 19 and 20, in the replies filed on 27 March 2008 and 03 April 2008 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 1 and 3-18 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the replies filed on 27 March 2008 and 03 April 2008.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Smith (2,136,641).

Smith discloses a heat exchange tube (11 in Fig. 2) and heat exchanger (Fig. 1) capable of having been made using the method according to claim 1, the tube (11) including a tube body portion constituting an outer hull of a flow passage (at 11), a flow passage divider (22) for dividing the flow passage, the

Art Unit: 3744

tube being capable of having been made by a roll forming process, a cutting process and a brazing process (Fig. 2).

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brinen, Hirano et al, and Yamamoto et al are cited to show heat exchanger tube structure.
